SOURCE : tsinskiy Rabotnik, No 7 (819), 1949. (Information requested.)NEW RED CROSS SERVICES IN THE USSRDr V. Rybasov
Moscow

The Moscow Red Cross organization is instituting some 22 new services, dealing primarily with sanitation and epidemiology. All these new services are well equipped with hair clippers, soap, DDT, and other equipment to carry out sanitary measures and control of epidemiological sources. The few preliminary reports coming in to headquarters confirm the efficiency and value of these added services.

For example, in Zagorsk, Red Cross workers undertook the mass examination of 20,000 students. Red Cross workers in the Orekhovo-Zuyev region are offering much aid to workers. One field group in this region worked valiantly during a recent outbreak of an infectious disease among textile workers and their families, efficiently setting up bathhouses and barbershops. In Ramensk Rayon, Red Cross workers have done meritorious work in four large kolkhozes.
